## Modulbeschreibung

Code	Modulbezeichnung
204-002	General Management

### Beitrag des Moduls zu den Studienzielen

#### Qualifikationsziele

The students will get an overview about selected management theories and concepts. The course will enable the students to set-up strategic plan with its specific components.

Participants will understand the opportunities and limitations of planning and management techniques. Students will be able to apply management techniques. They learn how to express a well-founded and independent opinion regarding general management issues. Students will develop an answer for the corporate responsibility for society and environment.

By implementing the acquired management know-how in a Corporate Strategic Planning Simulation they will improve their analysis and decision-making skills. The company is managed in small teams, which trains their interpersonal and due to the international composition of the MBA, their intercultural competences.

Students will understand the interdependencies between various functions of a company, e.g. marketing, sales, controlling and finance. This leads to a comprehensive understanding of the functioning of a company as a whole.

#### Inhalte

The course General Management aims at a comprehensive understanding of management on company level and general principles of business administration. To combine profound theoretical understanding of the main concepts with the skills of application to real life situations, the course is split into a lecture style input class with some exercises and a practical interactive Corporate Strategic Planning Simulation.

Concepts General Management has a focus on key concepts of business administration with respect to general management. The course provides a comprehensive, current look at the main facets of business, from the basics of economics, to the global business environment, different kinds of ownership structures, as well as entrepreneurship and small business. The class introduces to the principles of management and organization and embraces ethical issues and social responsibility of business.

Corporate Strategic Planning Simulation with a focus on business specific knowledge, skills and competences (e.g. ability to analyze profit and loss statements, decision-making under uncertainty), the understanding of the company as a complex system based on interactive elements like Marketing, Production, Finance, etc. and complex interdependencies to the environment as well as the experience of group working and dynamic group processes.

## Beschreibung für die Lehrveranstaltung

Code	Titel der Lehrveranstaltung
204-002	Corporate Strategic Planning Simulation

## Ausgestaltung

### Qualifikationsziele

The course is designed to strengthen professional but as well systemic and social competences.

With regard to professional competences students will – based on a short introduction of the relevant knowledge and their knowledge from other courses - strengthen their skills in solving problems not only in theory but in practice. They will have the ability to evaluate and interpret internal and environmental business data incl. the dealing with unforeseeable problems. They will be able to combine knowledge and gained information and apply this to generate suitable business decisions.

With regard to systemic competences students will not get a theoretic lecture in systemic theory but a first hand insight in real systemic interrelations between the single elements of a company and its surrounding. They will combine interdisciplinary knowledge in order to solve problems. They will experience the consequences of neglecting single aspects within the interdependent decision frame of their companies and will hereby run through a learning process that will strengthen their competences about complex systemic processes.

With regard to social competences students will be faced with the need to bring in their individual knowledge, strength and opinions in the group on the one hand and combine the individual inputs on the other hand in a way so that effective group interaction and processes emerge. This includes the need to harmonize or at least make compatible the individual ways of proceeding and to deal with and to overcome group conflicts. At the final company presentations all group members can test and improve their presentation skills. Summarized the students can test, challenge and improve their social competences.

Wissen	Kenntnisse	Fertigkeiten	Kompetenzen
--------	------------	--------------	-------------

### Inhalte

The course is a cross-sectional approach not only to general management but to many other courses of the curriculum of IM. The course challenges all participants – organized in 4-5 groups each with 4-5 members – to take over the top management of a company competing interactively with other companies for several periods.

The Learning Content is very broad and contains (not based on lecturing but on real experiencing)

- business specific knowledge, skills and competences (e.g. ability to analyze profit and loss statements, decision-making under uncertainty)

- the understanding of the company as a complex system based on interactive elements like Marketing, Production, Finance, etc. and complex interdependencies to the environment

- the experience of group working and dynamic group processes

#### **Lehr-/Lernformen**

#### **Lehr-/Lernmethoden**

Following an introductory interactive lecture the teaching method is based both on the usage of the TOPSIM Manager software (incl. a manual), a Corporate Strategic Planning Simulation, and the group working of the single companies acting in the game. The groups are supported by the teaching instructor who is directly available for all kinds of questions during the weekly in-class sections and by mail between these weekly classes.

#### **Literatur/Lehrmaterial**

Manual of the TOPSIM Manager, Corporate Strategic Planning Simulation (English version)

#### **Besonderes**

- Course is based on a Corporate Strategic Planning simulation - Intense group working

### Qualifikationsziele

In this course participants gain an overview of historic roots, developments, and challenges of organizing and managing information in general, and the ongoing rise of personal and networked computing over the last view decades in particular.

Participants know how to map, analyze, and conceptualize personal and collective landscapes of devices (phones, tablets, laptops, etc.), tools and services, for creating, sharing and managing digital artefacts and information items in mediated work settings. They are aware of how the ongoing proliferation of networked devices, tools and services, not only impacts their private life, but also fundamentally challenges the operation of organisations at large.

To better understand this emerging challenge, participants also gain an overview of classical and modern organisational theories and concepts. They also comprehend the importance and analytical value of such theories and concepts.

Participants can compare, analyze and reflect upon contemporary organizational structures in the light of the ongoing development of information technology and the changing nature of increasingly mediated work practices.

Wissen	Kenntnisse	Fertigkeiten	Kompetenzen

### Inhalte

- Historic roots, developments, and challenges of organizing and managing information
- The rise of personal and networked computing, smart phones, tablets etc.
- Personal and collective landscapes of tools and services
- Organizational Theories
- Organizational Structures – different types and models
- Cases of contemporary models of organization

### Lehr-/Lernformen

### Lehr-/Lernmethoden

Self-study of required literature

Two block-seminars (over two days), combining presentations/lectures, group work, discussion, reflective exercise, work with literature and video material.

### Beitrag des Moduls zu den Studienzielen

#### Qualifikationsziele

Students who successfully complete the course will be able to communicate financial information after analyzing financial statements.

- Acquire knowledge of business performance and turnover processes with respect to investment, financing and accounting
- Get a sound understanding about the concepts of accounting and their differences
- Obtain an overview on the presentation and disclosure components of financial statements
- Evaluate and analyse entity information and identify data relevant to financial accounting and reporting
- Perform calculations of measurement and valuation of important financial statement positions
- Present results of conversion to international accounting in writing in a (consolidated) financial statement format
- Understand the current legal environment and the auditing approach of an accounting firm
- Understand the different fields of investment and financing
- Understand and apply different forms of debt and equity financing
- Understand the process of structuring and securitisation of off-balance sheet financing
- Define different kinds of cash flows and apply discounted cash flow approaches
- Use table calculation programs for investment and finance calculations
- Be familiar with important approaches of the theory for investment and finance
- Apply these methods to solve typical problems
- Independently learn more sophisticated models

Subject related competences: 50%, Systemic competences: 20%, Interpersonal competences: 15%, Personal competences: 15%

Die Studierenden sind in der Lage, die u.g. Inhalte zu verstehen und anzuwenden. Dabei erweitern sie ihre

#### Ø Kenntnisse, Fertigkeiten und Kompetenzen im Fach

Die Studierenden gewinnen einen Überblick über die Inhalte einer Bilanz, GuV und Kapitalflussrechnung. Sie erhalten einen Überblick über verschiedene Ansätze der Rechnungslegung im internationalen Kontext. Sie verstehen, welche Auswirkung die Bewertungsansätze auf die ausgewiesenen Gewinne des Unternehmens haben. Sie sind in der Lage, Kennzahlen der Rechnungslegung zu ermitteln und zu interpretieren. Studierende sind in der Lage, Bilanzen und GuVs für gegebene Business Cases aufzubauen.

#### Ø Kenntnisse Fertigkeiten bezogen auf Systeme

Die Studierenden können die Rechnungslegung als Teil des Finanzmanagements einordnen. Sie verstehen den Zusammenhang zwischen der Rechnungslegung und der Bewertung von Investitionsvorhaben und den damit verbundenen Finanzierungskosten mit Hilfe von Planbilanzen und Plan-GuVs.

#### Ø Kenntnisse der Selbstorganisation

Die Studierenden befassen sich selbstständig mit Grundlagenliteratur zur Rechnungslegung. Sie sind in der Lage, unterschiedliche Methoden innerhalb der Rechnungslegung zu bewerten.

#### Ø Kenntnisse im Umgang mit Anderen

Die Studierenden diskutieren in der Lehrveranstaltung mit den anderen Mitgliedern der Gruppe über sinnvolle Lösungen zu den Business Cases.

204-004	Investment and Finance

## Ausgestaltung

### Qualifikationsziele

Students who have successfully completed this module, will have extensive knowledge of financial matters that are the basis of corporate decision making. Furthermore, they will have developed an understanding of financial forms and regulations in business and be familiar with financing and investment procedures as well as terms of periodic in- and out-payments. They acquire the skills to adequately apply common methods of static and dynamic investment calculation in business critical situations while using standard PC software.

The knowledge of the respective requirements and applications enables the students to recognize the advantages of certain investments and financing alternatives. They can apply their knowledge and skills in order to develop solutions for new challenges while making use of data processing, in particular spreadsheet analysis.

Wissen	Kenntnisse	Fertigkeiten	Kompetenzen
--------	------------	--------------	-------------

### Inhalte

Basic knowledge and skills to assess investments and financing of investments

Knowledge of facts and data:

Only knowledge of central terminology and basic numerical facts are expected:

- What do we mean with capital?
- How much capital do enterprises and the economy need in Germany and the EU?
- total borrowings in Germany and the EU
- key figures of liquidity
- current and historical interest rates of financial products
- source of information with respect to financial issues

Knowledge of methods: Main learning content is the instruction of financial method skills

- basic concepts of financial mathematics
- comparison of investment alternatives (static and dynamic methods)
- uncertainty of investment planning
- calculation of the need of capital
- financing
- funding
- the Lohmann-Ruchti-effect

- financing scheme

#### Lehr-/Lernformen

#### Lehr-/Lernmethoden

- lectures in the form of seminars with exercises integrated (individually and in groups)
- tutorial
- written and oral presentations with feed-back
- presentations and exercises with MS Excel-in the computer lab

## Modulbeschreibung

Code	Modulbezeichnung
204-005	Value Chain Management

### Beitrag des Moduls zu den Studienzielen

#### Qualifikationsziele

Besides the knowledge and understanding about the processes in Marketing Management and Supply Chain Management, the students improve their skills and competences in applying commonly used analytic tools and methods. Students will improve their planning competences in both areas.

They will improve their personal skills by creating plans and holding presentations and they will furthermore improve their interpersonal competences by preparing and presenting team assignments.

The systemic competences are developed with the help of an understanding of the interdependencies between the different supply and delivery processes of a company.

#### Inhalte

The participant will get a comprehensive understanding about the key processes in the value chain, from the understanding of initial customer needs, the development of a marketing strategy, to product creation, material supply sourcing, production planning and implementation, warehousing and delivery to end customers.

Whereas the lecture supply chain management is putting a stronger focus on the sourcing and delivery side, the lecture marketing management is focusing on the market related processes.

#### Lehr-/Lernformen

### Voraussetzungen für die Teilnahme

Kenntnisse, Fertigkeiten, Kompetenzen	Structured thinking and writing, Presentation skills. English language.
Vorbereitung für das Modul	

### Verwendbarkeit des Moduls

Zusammenhang zu anderen Modulen innerhalb des Studiengangs	Preparation for some of the electives
Einsatz in anderen Studiengängen	

### Bezüge des Moduls zur Nachhaltigen Entwicklung

### Inhalte

Discussion of sustainability in Supply Chain Management: Case Study Nespresso

### Prüfungsleistungen (Voraussetzung für die Vergabe von Leistungspunkten)

Art und Dauer	Anteil in %
Referat/Präsentation ( keine Einheit gewählt)	20 %
Klausur (90 Minuten)	80 %

204-005	Supply Chain Management and Purchasing

## Beschreibung für die Lehrveranstaltung

Code	Titel der Lehrveranstaltung
204-005	Marketing Management

## Ausgestaltung

### Qualifikationsziele

To develop an understanding about marketing in general. The ability to use the marketing tools and concepts to create a comprehensive marketing plan for a product or a company.

An improvement of the presentation skills in English language by presenting a marketing plan for a fictional product idea.

With respect to acquired knowledge, students shall be able to discuss marketing issues and to apply the marketing concepts to business situations.

In the end, students will have the competencies to independently apply marketing methods and concepts to new and unfamiliar situations.

Wissen	Kenntnisse	Fertigkeiten	Kompetenzen

### Inhalte

The course provides an overview about the key concepts of marketing. Prior to going into detail, the unit offers a comprehensive introduction to marketing by delivering an answer to the basic question: What is marketing?

The students learn about the marketing management process (i.e. the analysis of the internal and external environment, strategic business planning, strategic marketing planning, operative marketing planning, implementation and evaluation).

As a team assignment the students will prepare a marketing plan for a new market offering and hold a class room presentation.

### Lehr-/Lernformen

### Lehr-/Lernmethoden

Lecture in the form of seminars with exercises integrated (individually and in groups). Oral team presentations with MS Powerpoint and other media to the class with feedback.

### Literatur/Lehrmaterial

Principles of Marketing, 17th Edition, Kotler, Philip; Armstrong, Gary, 2017

## Ausgestaltung

### Qualifikationsziele

- Construct a model and argue within a model
- Understand economic expressions and economic thinking
- Analyze building blocks for further economic analysis
- Understand the economic principle and transfer to consumers' and producers' decisions
- Take the different points of view and to be able to put themselves into the different positions of economic actors, e.g.: consumer, producer under perfect competition, monopolist, monopsonist,
- Understand the price-market mechanism and application to reality
- Interpret government policy decisions, including their effects and limitations
- Communicate effectively on microeconomic matters – i.e., be able to understand, comment and write competently on fundamental issues affecting a firm or a household.
- Apply economic theory in real-world context
- Evaluate alternative microeconomic points of view
- Think critically as an economist, understand and present different points of view
- Research and evaluate data and economic literature
- Be able to read and understand some micro economic articles in reputable journals
- Evaluate existing and emerging theories underpinning economics within a practical context and application
- Generate in students some kind of passion for microeconomic circumstances and topics
- Make students understand how they can and do use microeconomics in their daily life
- Show students how they can and should apply their common sense in microeconomics
- Show in relation with several economic Nobel prizes awarded in the area of microeconomics the complexity of microeconomics and the importance and valuation in economics in general

Wissen	Kenntnisse	Fertigkeiten	Kompetenzen
--------	------------	--------------	-------------

### Inhalte

General Introduction into Economics

- Introduction to Microeconomics
- Consumer Theory
- Production and Cost Theory
- Perfect Competition
- Monopoly
- Oligopoly

- Monopolistic Competition

Review and outlook

#### **Lehr-/Lernformen**

##### **Lehr-/Lernmethoden**

- Inter-active lecture
- practical application of microeconomic course contents
- exercises during the lectures with presented solutions or with solutions worked out by the students, individually or in groups
- tutorial
- discussions
- use of beamer, overhead projector, white board, flip chart and meta plan, prepared transparencies, photocopies, articles out of newspapers
- use of internet links, for ex. references to economic Nobel prizes
- guiding questions at the beginning or during each lecture, answered during the lecture, reference to those questions at the end of each lecture.

## Modulbeschreibung

Code	Modulbezeichnung
204-007	International Business and Management

### Beitrag des Moduls zu den Studienzielen

#### Qualifikationsziele

The participants will develop their management skills and decision-making techniques needed in the context of International Management and International Human Resource Management. Students will develop the ability to apply the concepts to companies operating in the international environment.

Skills of HR interview techniques, competences to research a company situation in an international environment, development of the students' attitudes towards their own personal goals, learning about their personal development.

#### Inhalte

The students will get an overview about the challenges of International Management in general and the supporting tasks of International Human Resource Management more specifically. This entails the influence of the international environment on the management decisions of an international corporation. The cultural, economic, political and legal environment will be analyzed to learn about the consequences for companies doing business abroad. The influence of government decisions and regional economic co-operations on the success of business activities will be explained and described by theories and key indicators.

In addition to the general management perspective of Cases International Management, the class International Human Resource Management is completing the picture from the perspective of personnel management in an international environment and is a bridging link to the individual employee and MBA-student. Here, the students will work with the key methods of personnel selection and development. The students will have the chance to experience the use of personnel development concepts and career planning for their own further development.

#### Lehr-/Lernformen

### Qualifikationsziele

With respect to acquired knowledge, students shall be able to apply methods and theories of international management to real life situations. They will get the skills to handle critical company situations in an international environment taking into account the complexities of fast changing and only partially known conditions. They will become familiar with use of indicators and theories of international management for the analysis of company situations in international markets.

Wissen	Kenntnisse	Fertigkeiten	Kompetenzen
--------	------------	--------------	-------------

### Inhalte

This course is offered as a seminar. It provides theory and case studies of international management.

The students deal with the impact of the cultural, economic, political and legal environment on management of multinational enterprises.

They learn the use of International trade theories to explain government influence on trade.

Furthermore the influence of regional economic integrations like NAFTA and EU on organisations' success in business will be studied.

The consequences of factor mobility and foreign direct investments for international trade will be discussed.

The course concludes with international business strategy.

### Lehr-/Lernformen

#### Lehr-/Lernmethoden

Lectures with classroom discussions for presentation of concepts

Short case studies directly related to each chapter to apply concepts

Team preparation of case question prior to classroom discussion

Case study discussions in classroom, case developed on board

## Ausgestaltung

### Qualifikationsziele

- Understand the value proposition of the HR function - HR is not only an administrative function
- Learn the fundamentals of Labor Relations (Workers Councils, Unions, Collective Agreements, international differences) and understand the “pervasive effect” of labor relations and the border between “psychological” and “legal contract”
- Understand HR practices (Discipline, Grievance, Planning, Resourcing, Rewarding, Development, Leadership, and Reorganization)
- Understand and be able to take a standpoint within the current leadership discussions involving transactional vs. transformational leadership approaches
- Understand Personnel Development and Talent Management Programs
- Learn about Recruiting and selection
- Understand typical Rewarding (Compensation & Benefits) issues for Associate-Levels (Collective Labor Agreements) and Management-Levels, including bonus and incentive schemes
- Experience how to elaborate on a HR topic related with the lecture in a group work setting, giving a presentation, and defending one's standpoint in a Q&A session

Wissen	Kenntnisse	Fertigkeiten	Kompetenzen
--------	------------	--------------	-------------

### Inhalte

In this course we will think about all the topics HR is responsible for. This means, we will not only talk about HR as an “administrative” function, but try to grasp what value HR can add to the “business”. We will also link every topic to the leadership skills and abilities of Managers.

Lectures, classroom discussions, and exercises/cases will center on Leadership, Motivation, Discipline and Grievance, Labor Relations, Personnel Development and Talent Management, Employer Branding and Recruiting, Performance Management and Rewarding

### Lehr-/Lernformen

Lehr-/Lernmethoden

Lecture (including discussion, brainstorming, Q&A), Presentation by students

### Literatur/Lehrmaterial

## Beitrag des Moduls zu den Studienzielen

### Qualifikationsziele

Students:

- understand the relation between external and internal accounting.
- learn the structure and the methods of cost calculation for different cost categories, cost center and product cost. Methods of direct costing / contribution accounting are explained and contrasted. Comprehension for the complex valued based context in companies.
- apply different methods for the alternative valuation of questions on price strategy, product policy and production procedure
- understand international financial statements and are able to apply them for analysis and decision taking
- understand how financials are created, how to interpret them and how to make useful information for the business out of financial data
- are able to transfer the learned knowledge and tools to other subjects, e.g. marketing, mergers & acquisitions or strategy
- understand the strength, weaknesses and limitations of the tools and concepts which they learned and are able to match theory and reality and understand how models can help in a complex environment
- reach a certain level of general and financial professionalism
- can describe the tasks in the area of international finance management.
- get the knowledge to understand financial issues.
- understand the procedures and products on international financial markets.
- are able to independently develop solutions for financing problems.
- identify opportunities and risks in international finance and critically reflect international market developments.

### Inhalte

The students will get an overview about Management Accounting, International Reporting and Control and International Business Finance.

In Management Accounting, students learn to use internal analysis and planning tools as a basis for management decisions in general.

The lecture on International Reporting and Control puts the focus on the understanding, interpretation and limitations of financial statements. Matching theory and reality, furthermore students learn about financial reporting in an international context.

International Business Finance enables students to assess financing options in an international context and its respective risk management

### Qualifikationsziele

With respect to acquired knowledge, students shall be able to do the following:

1. summarize and interpret state-of-the-art concepts in management accounting and performance management
2. evaluate and manage overhead costs adequately by applying Traditional Costing as well as Activity Based Costing and interpreting the compiled information
3. support new product development according to market needs, particularly meeting the necessary price and cost targets by applying Target Costing
4. see the different management accounting and performance management concepts and tools in an overall context and understand their interdependences

With respect to acquired skills, students shall be able to do the following:

1. identify data relevant to management accounting and performance management
2. solve problems in theory and practice by applying the above mentioned concepts and tools
3. evaluate and interpret practical cases and derive conclusions independently

With respect to acquired competencies, students shall be able to do the following:

1. recognize practical business challenges in the areas of management accounting and performance management
2. apply and modify their knowledge to new and complex challenges
3. draw on and make use of adequate sources of information in order to solve these challenges
4. perform necessary calculations in the course of problem solving with the above mentioned concepts and tools
5. reflect the derived results critically and draw conclusions

Wissen	Kenntnisse	Fertigkeiten	Kompetenzen

### Inhalte

#### Part 1: Focus on Decision Making

Chapter 1: Managerial Accounting, the Business Organization, and Professional Ethics

- Careers in Accounting
- Roles of Accounting Information
- Performance Report

Chapter 2: Introduction to Cost Behavior and Cost-Volume-Profit Relationships

- Cost drivers and cost behavior
- Variable costs, fixed costs, step costs and mixed costs
- Cost-Volume-Profit Analysis
- Contribution margin and gross margin

#### Chapter 3: Measurement of Cost Behavior

- Cost functions
- Account Analysis
- High-Low-Method
- Least-Squares Regression Method

#### Chapter 4: Cost Management Systems and Activity-Based Costing

- Cost Management System
- Direct and Indirect costs
- Cost Allocation
- Manufacturing costs
- Traditional costing vs. Activity-Based Costing

#### Chapter 5: Relevant Information for Decision Making with a Focus on Pricing Decisions

- Concept of Relevance
- Alternative Income Statements: Absorption Approach & Contribution Approach
- Accept or Reject Special Sales Order
- Cost-Plus-Pricing
- Target Costing

#### Chapter 6: Relevant Information for Decision Making with a Focus on Operational Decisions

- Opportunity costs
- Make-or-Buy Decision
- Deletion or Addition of Products, Services or Departments
- Product-Mix-Decisions
- Keeping or Replacing Equipment

## Part 2: Accounting for Planning and Control

### Chapter 7: Introduction to Budgets and Preparing the Master Budget

- Preparing a Master Budget

### Chapter 9: Balanced Scorecard

- Preparing a Balanced Scorecard, incl. cause-and-effect relationships

### Part 3: Product Costing (corresponds to part 4 in the textbook)

### Chapter 12: Cost Allocation

- Allocation of support department costs to producing departments
- Direct method and Step-down method
- Allocation of from producing departments to products

#### **Lehr-/Lernformen**

### Qualifikationsziele

Students

- understand international financial statements and are able to apply them for analysis and decision taking
- understand how financials are created, how to interpret them and how to make useful information out of financial data
- are able to transfer the learned knowledge and tools to other subjects, e.g. marketing, mergers & acquisitions or strategy
- understand the strength, weaknesses and limitations of the tools and concepts which they learned
- match theory and the reality and understand how models can help in a complex environment
- obtain the knowledge for subsequent subjects
- reach a certain level of general and financial professionalism (presentation skills, ability to structure complex subjects, draw meaningful conclusions out of performed analysis,
- focus and define priorities, explain finance to non finance people)
- obtain an advanced level of common software applications (e.g. PowerPoint, Excel etc.)

Wissen	Kenntnisse	Fertigkeiten	Kompetenzen
--------	------------	--------------	-------------

### Inhalte

- Basic differences and common aspect between IFRS and HGB
- Overview of IFRS financial statements and their applications (structure, definitions, specific items e.g. accrual accounting, goodwill, impairments, lease accounting, percentage of completion, ratios etc.)
- Basics of reporting (segment reporting, consolidation and intercompany eliminations, planning and reporting in an international environment with multiple currencies, transfer pricing)
- Basics of corporate finance (DCF, NPV, IRR, WACC, CAPM, value creation) and decision making

### Lehr-/Lernformen

#### Lehr-/Lernmethoden

Lectures and presentation by the professor

- Ad hoc exercises based on examples taken from the real business incl. workshops and short student presentations
- Guest presentations from the professors business environment (e.g. Finance manager Romania)
- Case study, which is combined with Cases International Marketing.

It is performed in group work concluding with a presentation. It is based on own research, theory from the lectures, industry basics and requires skills and knowledge from other subjects (e.g. accounting and financial statements; cost accounting, quantitative methods)

**Literatur/Lehrmaterial**

- Principles of corporate finance, Brealey Myers,
- Coenenberg, Jahresabschluß und Bilanzanalyse,
- Grünberger, IFRS, einsystematischer Praxis-Leitfaden
- articles from newspapers (Handelsblatt); equity research database from investment banks

**Besonderes**

PowerPoint presentation, Excel tables, flip chart, white board and script - Internet research and literature study - guest speakers - case study

**Organisation**

<b>Präsenz in SWS</b> 2,00	<b>Gruppeneinteilung</b> nein	<b>empfohlenes Fachsemester</b> 2 Semester	<b>Sprache</b> Englisch

## Beschreibung für die Lehrveranstaltung

Code	Titel der Lehrveranstaltung
204-008	International Business Finance

## Ausgestaltung

### Qualifikationsziele

Students will be able to describe the area of responsibility of international corporate finance management in their own words. They will have the relevant expertise to identify and classify the specific problems in this area. Students will understand the basic processes and products in the modern financial markets. Based on this, they will be able to independently develop solutions to the financial problems in a corporate environment. They can fall back on the knowledge gained of the learned mathematical methods. Students will also be able to assess the opportunities and risks of international corporate finance and global business activity and can critically reflect on developments in international markets.

Wissen	Kenntnisse	Fertigkeiten	Kompetenzen
--------	------------	--------------	-------------

### Inhalte

Students will acquire basic knowledge about the meaning and structure of international financial markets. The investment and financing instruments issued and traded on the financial markets are presented and explained in detail. Particular attention is paid to the analysis of foreign exchange markets, as well as to the transactions and practices observed on them. Based on this, the methods for hedging currency risk are discussed. An important topic in this context is the use of modern derivative financial instruments. The application of the instruments shown and the functional areas of international corporate finance management are practiced on the basis of case studies and in group work.

## Modulbeschreibung

Code	Modulbezeichnung
204-009	International Value Chain Management

### Beitrag des Moduls zu den Studienzielen

<b>Qualifikationsziele</b>
The students will develop their knowledge about international marketing methods for market selection and development. Their intercultural competences will be trained as a personal competence. By solving a large case study in teams, the students also train their project management skills, their presentation skills and their interpersonal competences to work in teams. As this case study is applied to two module subjects, the students also develop their comprehension of cross-functional inter-dependencies between the areas of finance and marketing.
<b>Inhalte</b>
The participants will learn how to market products in the international context. There is a special focus on the development of international market opportunities and the related intercultural challenges. Whereas the training of intercultural competence skills is of universal usability, there is a certain focus on marketing and management related application of those skills.
<b>Lehr-/Lernformen</b>

### Voraussetzungen für die Teilnahme

<b>Kenntnisse, Fertigkeiten, Kompetenzen</b>	General understanding of the principles of marketing. Knowledge about the project management tools
<b>Vorbereitung für das Modul</b>	Comparable knowledge to the above class

### Verwendbarkeit des Moduls

<b>Zusammenhang zu anderen Modulen innerhalb des Studiengangs</b>	Participation in module "Value Chain Management", especially in class "Marketing Management"
<b>Einsatz in anderen Studiengängen</b>	

### Bezüge des Moduls zur Nachhaltigen Entwicklung

<b>Inhalte</b>
Sustainability Marketing, Marketing in emerging markets ("Bottom of the Pyramid")

## Ausgestaltung

### Qualifikationsziele

With respect to the acquired knowledge, students shall be able to handle problems in international marketing which are typical for the search of new market opportunities outside their national market.

In the case study they will develop creative approaches to apply the concepts to complex real life situations in the international marketing environment. They will strengthen the ability to apply the project management skills and methods acquired in the first semester in the class Project Management. Furthermore they will develop their presentation skills in English.

After that class students will have the competencies to independently further develop their skills in international marketing.

Wissen	Kenntnisse	Fertigkeiten	Kompetenzen

### Inhalte

To develop an understanding about cross-border marketing and sales activities on a global scale.

To be able to apply the concepts and theories in Case Studies.

The class will focus on the topics of

- Market selection
- International Market Environment
- International Market Research
- International Marketing planning
- Modes of operation/Market entry modes
- Marketing strategy
- International Marketing Mix

### Lehr-/Lernformen

### Lehr-/Lernmethoden

- Lectures with class room discussion on current examples and case studies
- Planning of case study group assignment with project management tools
- Written and oral group presentation of case study in English
- Case study tutorial together with International Reporting and Control (Module IM-2.03.02)

204-009	Intercultural Competence

## Ausgestaltung

### Qualifikationsziele

- Acquire the necessary fundamentals for the internationalization of a company
- Develop an integrative understanding on International Management
- Apply the acquired knowledge in the real life environment of a company

With respect to acquired knowledge, students shall be able to identify typical problems of internationalization of companies and intercultural challenges coming up hand in hand with the globalization of business.

They will get the skills and instruments to handle intercultural problems which are typical for enterprises going global and will become familiar with the use of methods to support internationalization processes, especially in the field of marketing and human resources.

Wissen	Kenntnisse	Fertigkeiten	Kompetenzen
--------	------------	--------------	-------------

### Inhalte

- Definition of terminology, culture, intercultural aspects, competences
- Explanation of cultural concepts and models about values
- Intercultural aspects by taking the example of corporate cultures
- Intercultural communication and its relevance in the context of international Marketing, especially advertising and Corporate Identity

### Lehr-/Lernformen

#### Lehr-/Lernmethoden

### Beitrag des Moduls zu den Studienzielen

#### Qualifikationsziele

Subject related competence:

Students will be able to apply important methods and instruments of information acquisition. With the help of electronic media, they will be able to compile the relevant literary sources, bibliographies and documentation needed for scientific work. Furthermore, they will be able to use empirical methods of collecting data as well as the evaluation procedures and ways of presenting results that such methods offer in order to solve problems. Students will be able to employ important systematization techniques, form requirements, various types and usages of visualization and presentation techniques and will avail of a range of interaction possibilities. They will understand the significance of prudent organization in order to effectively deal with complex tasks in written, medial and rhetorical form and can act accordingly. Based on this, they will be able to select information that is relevant for their problem statement and communicate this information systematically under consideration of formal scientific requirements in written and oral form. They will not only be able to apply acquired expertise and methodology, but will also be able to transfer this knowledge in the solving of other scientific problems.

Systemic competence:

Students will be able to systematically acquire knowledge in other disciplines and to transfer and make use of this knowledge in the solving of complex problems.

Interpersonal competence:

Students will be prepared to communicate and discuss their knowledge and experience in German as well as English.

Personal competence:

Students will be able to independently and responsibly organize their work and deal with the tasks they are confronted with in a rational, responsible, systematic and goal-oriented way.

Subject related competences: 50%, Systemic competences: 30%, Interpersonal competences: 10%, Personal competences: 10%

#### Inhalte

The students shall deal with complex economic issues effectively, responsibly and efficiently in written form.

#### Lehr-/Lernformen

### Qualifikationsziele

**Knowledge:** The students demonstrate the ability to find the relevant technical and scientific literature for a topic, save it in a citation-oriented way and evaluate it using subject-specific methods. They are familiar with various rhetorical means as well as media aids and their effects.

**Skills:** Students are able to identify and critically analyse pertinent business issues and present their insights and results according to the common academic standards in writing and to present them in a way that is appropriate for the target group. Students have mastered the necessary learning and working techniques to produce scientific papers, thus demonstrated the ability for independent scientific work.

**Competences:** Students demonstrate the ability to analyze, structure and critically reflect on subject-specific topics and problems, also from interface areas. They are able to develop adequate solutions in writing. They are able to prepare written scientific papers as lectures, to communicate freely and to use media for illustration. Students will be able to lead team discussions in a goal-oriented and collaborative manner for the participants.

Wissen	Kenntnisse	Fertigkeiten	Kompetenzen
--------	------------	--------------	-------------

### Inhalte

Students acquire comprehensive, advanced knowledge in the field of scientific work and effective speech (level 6). In the independent, self-directed handling of a complex economic subject they acquire specialized knowledge, current knowledge and critical awareness in selected economic fields, partly at the interface between different fields (level 7).

### Lehr-/Lernformen

#### Lehr-/Lernmethoden

### Qualifikationsziele

The students will be able to

- describe a firm's ties to foreign partners via international trade, foreign direct investment and migration with adequate methods
- identify suitable, optimal and responsible possibilities of integrating firms into international markets within and without the boundaries of the firm
- understand the mechanisms behind free trade and protectionism that work on a firm's competitiveness and their consumers' well-being
- apply long established as well as latest economic concepts in international trade theory to real business situations

derive international business strategies from basic firm characteristics for acting responsibly on international markets and in foreign world regions

Wissen	Kenntnisse	Fertigkeiten	Kompetenzen
--------	------------	--------------	-------------

### Inhalte

The students will

- learn to recognize, describe and analyse a firm's linkages to the globalized economy
- understand the scope and the scale of fragmentation of value chains and economic linkages across national borders
- get an impression of the heterogeneity of sizes, characteristics and business strategies of today's multinational firms
- learn to benefit from the sustainable usage of offshoring and outsourcing
- get to know and learn to control the modes and the risks that are induced by international real and monetary economic linkages between markets and currency areas
- get familiar with the effects of exchange rate changes and monetary policy on the firm's competitive edge

get to know the impact of world regions, distance, trade costs, differences in culture and language on the international fragmentation of the value chain

### Lehr-/Lernformen

### Lehr-/Lernmethoden

Students take actively part in the lectures

- The lectures are complemented with case studies, discussions and solutions of current economical problems from newspapers and practitioners

**Literatur/Lehrmaterial**

Selection of classical textbooks, journal articles, and transfer of own scientific results

**Besonderes**

Slides, blackboard, and gathering of own material on the online learning platform neo.

**Organisation**

<b>Präsenz in SWS</b> 2,00	<b>Gruppeneinteilung</b> nein	<b>empfohlenes Fachsemester</b> 3 Semester	<b>Sprache</b> Englisch
<b>Präsenz/Kontakt</b> 22,5 Std.	<b>Vor-/Nachbereitung/Selbststudium</b> 20,0 Std.		<b>Aufgaben/ Gruppenarbeit</b> 7,5 Std.

## Beschreibung für die Lehrveranstaltung

<b>Code</b>	<b>Titel der Lehrveranstaltung</b>
204-016	Foreign Trade, Sustainable Development and Innovation

## Ausgestaltung

### Qualifikationsziele

The students

- understand urgency of action in the area of sustainable development
- understand ties of foreign trade to resource use, companies' role, and innovation
- learn to formulate firm strategies and manage risks

learn to work with current literature and formulate firm strategies in form of an essay

Wissen	Kenntnisse	Fertigkeiten	Kompetenzen
--------	------------	--------------	-------------

### Inhalte

The students

- identify challenges of the climate crisis on the backdrop of global demographics, income growth, and trade
- acknowledge pathways towards the defossilisation of the economy
- study the role of inequality and cumulative emission paths as burdens for global, multilateral climate action
- understand companies as boon or bane for transformation
- explore economic tools for steering eco-scarcities and a new economic paradigm for a “full world” (Daly 2015)

### Lehr-/Lernformen

#### Lehr-/Lernmethoden

Lectures, focused reading, text discussion, problem based writing

#### Literatur/Lehrmaterial

- Journal newspaper articles (Daly 2015, Economist 2019, Rodrik 2019, Amel et al. 2017, Bolotnikova 2019, ...)

#### Besonderes

Focused work with literature, essay writing, strategy formulation

## Modulbeschreibung

Code	Modulbezeichnung
204-027	Strategy Cases

### Beitrag des Moduls zu den Studienzielen

#### Qualifikationsziele

The students will get knowledge about the different perspectives and levels on which business strategy can be used. Beyond that they will develop a comprehension about the different conceptual opinions taken by renowned authors. Rather than taking a simplistic one theory fits all, towards the end of the MBA program the students have to admit, that there are several contradictory views on a topic, which are seen here as a paradox.

By doing so the students keep an open attitude towards continuous learning also beyond the MBA.

#### Inhalte

This course offers the students a detailed definition of „Strategic Direction, Business Transformation“. This term includes aspects like “Strategy Process”, “Strategy Content” and “Strategy Context” that are carefully distinguished in the lecture. To expand the theoretical frame the course explores the issues of “Organizational Purpose” and “Strategic change management”. The students will analyze certain case studies in which the constituent parts of the lecture will be applied.

#### Lehr-/Lernformen

## Modulbeschreibung

Code	Modulbezeichnung
204-010	International Supply Chain Management

### Beitrag des Moduls zu den Studienzielen

#### Qualifikationsziele

Students are able to set supply chain and purchasing management tasks and requirements in relation to other ideas and concepts inside and outside the company and have the necessary knowledge in order to formulate specific problems.

Students can solve supply chain management and purchasing problems in theory and practice by using suitable methods and tools. They should have the ability to plan and carry out these methods and tools to collect, interpret and classify necessary data to meet defined requirements.

Students are able to recognize, analyze, evaluate, discuss and predict occurring problems by using specific methods and combine interdisciplinary knowledge in order to develop (new) solutions. They transfer and adopt various methods in a suitable and effective way in a changing supplier environment and reflect and judge on uncertainty.

#### Inhalte

This course provides the opportunity to more profoundly study the topics of Supply Chain Management and Purchasing with a special focus on the international aspects.

##### Supply Chain Management

- Analysis and planning of production networks
- Demand planning and scheduling of lean production systems
- Operative purchasing (ordering, dispatching and expediting)
- Logistics and material flow on different levels
- Sales administration and customer relationship management
- Supply chain controlling and leadership
- Tools and IT systems

##### International Purchasing

- purchasing function, value contribution of purchasing
- basic elements of purchasing contracts
- contract negotiation
- the sourcing/ RFQ process
- cost estimations in purchasing
- purchasing strategy
- purchasing tools

- negotiation skills
- purchasing work in a global environment

## Ausgestaltung

### Qualifikationsziele

Initial Situation: Globalization and cost driven competition forces world wide operating companies to integrate and redesign their overall sourcing, production and sales activities. Supply Chain Management departments in large and, increasingly, also in small and medium size companies link all parties that are directly or indirectly involved until the product finally gets to the customer's hands. This includes suppliers, transporters, manufacturers, service providers, retailers and customers.

Aim: The course "International Supply Chain Management" starts with current challenges for different companies and branches and shows state of the art concepts for designing and managing complex global supply chains for manufacturing networks, based upon Toyota's lean production principles.

Group of Interest: This lecture addresses to students of all backgrounds who are willing to think about solutions instead of problems and who are able to abstract very special unique operations and tasks into general processes upon information and material flows.

Wissen	Kenntnisse	Fertigkeiten	Kompetenzen

### Inhalte

- Analysis and planning of production networks, including aims, targets and ratios
- Demand planning and scheduling of lean production systems
- Operative purchasing (ordering, dispatching and expediting)
- Logistics and material flow on different levels
- Sales administration and customer relationship management
- Supply chain controlling and leadership

204-011	Applied Controlling

### Beitrag des Moduls zu den Studienzielen

#### Qualifikationsziele

Objective of the module is to provide an overview about the latest theoretical concepts of strategic and operative controlling, about the organisational integration of controlling within the organisation of a corporation and about the variety of instruments in the area of controlling.

In addition to the subject related knowledge, the students will learn how to use the operative and strategic controlling tools.

The students will develop the ability to apply the operative and strategic controlling tools to solve business problems.

#### Inhalte

##### Operative Controlling:

Controlling from a functional and institutional perspective

Planning and control function of Controlling, Budgeting

Information provision function and key performance indicators

Accounting concepts and cost definitions to prepare decision making,

Marginal cost accounting, Activity Based Cost Accounting, Target Costing

##### Strategic Controlling:

Basics, Strategic Objectives and Goals, Strategic Planning, Strategy Implementation, Controlling of strategies by value based management, controlling of strategies by strategic control, strategic risk management systems, strategic project controlling, integration of Strategic Controlling into strategic management

#### Lehr-/Lernformen

204-011	Grundlagen des Controllings, Entscheidungsorientiertes Rechnungswesen

## Ausgestaltung

### Qualifikationsziele

Ziel des Lehrmoduls ist es, den Studierenden einen Überblick über die sich in den vergangenen Jahren stark gewandelten theoretischen Konzepte des Controlling, über die organisatorische Einordnung des Controlling in das Unternehmen sowie über die Vielfalt der Controllinginstrumente bei der Koordination der Führungsfunktion zu vermitteln. Hierbei werden den Studierenden neben der Theorie Kenntnisse in den wichtigsten operativen Controllinginstrumenten vermittelt. Es werden die Deckungsbeitragsrechnung, die Prozesskostenrechnung, das Target Costing und das Life Cycle Costing vorgestellt und anhand von Fallstudien vertieft. Die Studierenden werden in die Lage versetzt, die operativen Controllinginstrumente zur Lösung betriebswirtschaftlicher Problemstellungen einzusetzen.

Wissen	Kenntnisse	Fertigkeiten	Kompetenzen
--------	------------	--------------	-------------

### Inhalte

Grundlagen des Controllings:

1. Controlling aus funktionaler Sicht
2. Controlling aus institutionaler Sicht
3. Planungs- und Kontrollfunktion des Controlling
4. Budgetierung (Traditionelle, Better Budgeting, Beyond Budgeting)
5. Informationsversorgungsfunktion des Controlling
6. Kennzahlen im Controlling
7. Controlling in verschiedenen Funktionsbereichen (Produktion, Vertrieb, Logistik, etc.)

Entscheidungsorientiertes Rechnungswesen:

1. Entscheidungsorientiertes Rechnungswesen und entscheidungsorientierter Kostenbegriff basierend auf den theoretischen Aussagen nach Riebel
2. Grenzplankostenrechnung nach Kilger
3. Prozesskostenrechnung
4. Target Costing nach Horváth
5. Kuppelkalkulation

### Qualifikationsziele

Ziel des Lehrmoduls ist es, den Studierenden einen Überblick über die theoretischen und praktischen Konzepte des strategischen Controlling zu vermitteln. Die Basis der Vorlesung bildet ein umfangreicher Überblick über das strategische Management aus dem Blickwinkel des Controllings. Es werden die wichtigsten strategischen Controllinginstrumente vorgestellt und anhand von Praxisbeispielen deren Anwendungen in der Wirtschaft verdeutlicht.

Die Studierenden werden in die Lage versetzt, die strategischen Controllinginstrumente zur Lösung betriebswirtschaftlicher Problemstellungen einzusetzen.

Wissen	Kenntnisse	Fertigkeiten	Kompetenzen
--------	------------	--------------	-------------

### Inhalte

- Grundlagen
- Strategische Zielbildung
- Umfeldanalyse
- Unternehmensanalyse
- Strategiewahl
- Strategieumsetzung
- Steuerung von Strategien durch wertorientierte Kontrolle
- Steuerung von Strategien durch strategische Kontrolle
- Strategische Frühaufklärung
- Strategisches Projektcontrolling
- Einordnung des Strategischen Controllings in das Strategische Management

## Modulbeschreibung

Code	Modulbezeichnung
204-012	Corporate Social Responsibility and Sustainability

### Beitrag des Moduls zu den Studienzielen

<b>Qualifikationsziele</b>
Understand the concept of sustainable development and how it affects companies in the world of today
Learn how companies can implement sustainability management in a structured, consistent approach in order to create shared value: for themselves as well as for society
Apply the knowledge in critical discussions of examples, case studies, guided exercises and assignments
<b>Inhalte</b>
The module explains why sustainability matters, how strategies and leadership can be developed, and how sustainable value chains can be implemented. Further elements are the communication with stakeholders, including sustainability reporting and sustainability ratings. In addition, there will be a dedicated part about the relevance of human rights in global business.
<b>Lehr-/Lernformen</b>

## Ausgestaltung

### Qualifikationsziele

Understand the concept of sustainable development and how it affects companies in the world of today

Learn how companies can implement sustainability management in a structured, consistent approach in order to create shared value: for themselves as well as for society

Apply the knowledge in critical discussions of examples, case studies, guided exercises and assignments

Wissen	Kenntnisse	Fertigkeiten	Kompetenzen
--------	------------	--------------	-------------

### Inhalte

#### 1. INTRODUCTION

Conflicting goals, sustainability definition, sustainability drivers, reality check: What's not working today?

#### 2. SUSTAINABILITY LEADERSHIP

Introduction, leadership, motivation, communication, case study: Interface Flor

#### 3. SUSTAINABILITY STRATEGY

Sustainability frameworks, sustainability maturity, stakeholders & dialogue, materiality assessment, shared value creation, business value of sustainability

#### 4. SUSTAINABLE VALUE CHAINS

Sustainability & value chains; Value chain dimensions: product sustainability, corporate sustainability, supply chain sustainability

#### 5. SUSTAINABILITY COMMUNICATION

Sustainability Reporting, Sustainability Rating

### Lehr-/Lernformen

### Lehr-/Lernmethoden

Combination of initial teasers to raise interest, lecture elements to introduce topic and required methods, application of the theoretical content in discussion and exercises, assignments that must be completed in group work

## Ausgestaltung

### Qualifikationsziele

- Gain understanding of the philosophical underpinnings and legal norms of internationally recognised human rights.
- Foster ability to understand and analyse primary sources of human rights law, relevant to business.
- Ability to translate the requirements of central Business & Human Rights norms into the business context and apply them to corporate realities.
- Develop an understanding of the strategic importance of integrating human rights into future business decisions.

Wissen	Kenntnisse	Fertigkeiten	Kompetenzen
--------	------------	--------------	-------------

### Inhalte

The course will provide an overview of the topic and nexus between business and human rights, including its origins, the increasing legal and regulatory background and the practical application to the business context. It will also consider both legal and practical challenges on the basis of case studies and will discuss future developments in the field.

## Modulbeschreibung

Code	Modulbezeichnung
204-013	Business Process Management

### Beitrag des Moduls zu den Studienzielen

#### Qualifikationsziele

Objective of the module is to provide an overview about the concept of the topic Business Process Management. Approaches from literature and practise will be used and case examples from the practical consulting work discussed. Besides the general overview about Business Process Management, the module is focused on a certain method of process modelling and explains this with a consistent practical example.

Objective of the elective. Every student

- Has an understanding about the meaning of „Business Process Management“.
- Knows the different approaches of Business Process Management.
- Knows the differences between Macro und Micro Modelling
- Understands in which situation a company has to think about their existing process structure,
- Understands how to design a process model according to the presented method
- Knows the common mistakes in process modelling.
- Understands how to conclude an organisation structure fitting to the processes.

Subject related competences: 40%, Systemic competences: 20%, Interpersonal competences: 15%, Personal competences: 25%

#### Inhalte

- Introduction to Business Process Management
- Overview about current approaches to Business Process Management
- Common mistakes with process modelling
- Difference between Macro and Micro Modelling
- Strategy-Review as input
- Development of Macro Processes
- Procedure with regard to detail the Macro Processes (Micro Modelling)

Creation of a suitable organisation structure

### Beitrag des Moduls zu den Studienzielen

#### Qualifikationsziele

Students will

...discover and identify a problem and articulate it as a valid business question in such a way that a business leader would value the subsequent research and results.

1. ...take a global stance - unified but leveraging unique perspectives - to the issue of business sustainability
2. ...describe how firms operationalize sustainability in the real world
3. ...work successfully in a collaborative, multi-cultural fashion both face to face and virtually.
4. ... apply current analytical tools (those students already know) to the research results - examples: descriptive statistics, exploratory data analyses, structured interviews, text or web page analysis, etc.
5. ...contribute to a positive and curious environment in a cross cultural setting (examples: interacting regularly with a member of the class, demonstrating respect for differences, helping behaviors, acting warmly and supportively)
6. ...understand the importance of the social and political environment in doing sustainable business
7. ...identify stakeholders in the business environment

Finally, students will improve their capabilities of presenting and discussing a comprehensive topic in English.

#### Inhalte

The course consists of one block seminar:

- Innovation for Sustainability (equivalent to 6 SWS, "Blockseminar") with two on-site weeks in September (attendance required)

Exam: StA: written paper and presentation

thereof: an individual kick-off presentation at the beginning (pass/fail), Formulation of research questions in your team (10 %), participating in regular joint reflections about what we have seen and heard and Photo Voicing (10%), a visual representation of the research object (15%), description of the business environment (10%), a "Research Paper "Pitch" (15%), the final research paper (40%), personal attendance required

## Modulbeschreibung

Code	Modulbezeichnung
204-025	Managing Innovation

### Beitrag des Moduls zu den Studienzielen

#### Qualifikationsziele

In this course students will experience innovation leadership via hands-on development of concepts and prototypes. Students will learn how leaders view and manage the innovation processes in organizations. They will also learn how to create shared value products through a sample of structured innovation processes and strategies including tools from engineering, design, marketing, operations, strategy, finance and management.

There are two major goals of this course:

- 1.) To shift from the idea of resource and social *compromise* to a generative, innovative value creation that considers broad and long-term goals for sustainable profitability and
- 2.) To train future business leaders in both conceptual and execution strategies modern firms employ in their cross-functional innovation activity.

The objectives of this course are the following:

- Articulate how an organization can use cross-functional teams to integrate community value or shared value in product design
- Communicate how to deploy cross-functional teams to identify relevant customers and communities and articulate future innovation opportunities
- Communicate how to create new product concepts that simultaneously create customer, business and community value while increasing employee engagement and community investment in new products
- Articulate and deeply understand the role innovation leaders play in the success of innovation processes in their organizations

#### Inhalte

This course will be a mix of lectures, small group discussions, hands-on product development techniques, creativity exercises, teamwork and leadership training and a workshop on product innovation.

#### Lehr-/Lernformen

### Voraussetzungen für die Teilnahme

Kenntnisse, Fertigkeiten, Kompetenzen	Ability to read and understand economical, juridical and ethical articles on an academic level

204-025	Design Thinking Workshop

## Ausgestaltung

### Qualifikationsziele

This provides practical hands-on exercises to learn how to answer the fundamental question:

How can we design products for shared value in a market place that focuses almost exclusively on profit? The notion of "shared value" derives from Michael Porter's concept that business impact should have a positive outcome for multiple stakeholders, not just shareholders.

The objectives of this workshop are the following:

- Apply the practice of a structured innovation process based on the deep understanding of the innovation processes that integrate a shared value mindset.
- Apply critical innovation leadership principles
- Learn how to articulate product concepts and use sketching to communicate ideas
- Gain insight into how best to leverage teamwork in innovation and product development

Wissen	Kenntnisse	Fertigkeiten	Kompetenzen
--------	------------	--------------	-------------

### Inhalte

This module is aimed to supplement the theoretical concepts provided in the concepts part of the module and particularly applying concepts of structured innovation management with the objective of creating shared value.

- Concept of Shared Value
- Job mapping
- Customer Centered Innovation Map
- Design Thinking
- Application of House of Quality
- Front Load the Product Design Process

204-029	Business Challenge

### Beitrag des Moduls zu den Studienzielen

#### Qualifikationsziele

The goal of this Business Challenge Module is to develop a successful business model for a real life challenge for a company or other organization using methods of open innovation.

Each year, the challenge will be defined in cooperation with a local organization prior to the start of the module.

Example from previous years: The goal for the students of this Business Challenge is to co-create new service business models for a new product in the area of waste management at urban construction sites.

Thereby, students from different disciplines will engage in open innovation, that is, they will blend external ideas with internal ones.

### Beitrag des Moduls zu den Studienzielen

#### Qualifikationsziele

*The goal of the thesis is the qualification of the graduates to work independently on a project, scientifically and systematically. The thesis is supervised by a professor.*

*The Master's thesis includes the independent development of a scientific/academic subject, which research project is theory founded, and the results of which are analyzed and be linked to the state of the art in the field.*

*In the Master Thesis, which concludes the study program, a task is independently completed.*

*The topics are assigned in dialogue with the student and professors. A suggestion of topics from the operational practice is possible and is supported, provided that it is agreed upon with the supervising professor.*

*Creativity, independent learning, self-organization and time management are key factors of the Master's thesis.*

Die Master-Thesis beinhaltet das selbständige Erarbeiten einer wissenschaftlichen Arbeit, die ein frei gewähltes Forschungsprojekt theoretisch begründet, dessen Ergebnisse analysiert und dokumentiert werden und zum Stand der Fachwissenschaft in Verbindung gesetzt werden.

In der das Studium abschließenden Master-Thesis wird eine Aufgabe selbstständig bearbeitet. Die Themenstellungen werden im Dialog mit dem Studierenden und Professoren vergeben. Ein Themenvorschlag aus der betrieblichen Praxis ist möglich und wird unterstützt, sofern dieser mit dem betreuenden Professor abgestimmt ist.

Kreativität, Selbstständiges Lernen, Selbstorganisation und Zeitmanagement sind zentrale Handlungskompetenzen, die hier geübt werden.

#### Inhalte

*Regarding the design of the module element: no statement can be made, since the topics are agreed upon individually.*

#### Lehr-/Lernformen

### Voraussetzungen für die Teilnahme

Kenntnisse, Fertigkeiten, Kompetenzen	
Vorbereitung für das Modul	

### Verwendbarkeit des Moduls

<b>Zusammenhang zu anderen Modulen innerhalb des Studiengangs</b>	
<b>Einsatz in anderen Studiengängen</b>	

### Bezüge des Moduls zur Nachhaltigen Entwicklung

<b>Inhalte</b>
Selected master thesis topics on developing and transformational economies and sustainable development.

### Prüfungsleistungen (Voraussetzung für die Vergabe von Leistungspunkten)

Art und Dauer	Anteil in %
Masterarbeit (4 Monate)	100 %

### Organisation

<b>Modulverantwortliche/r</b> Prof. Dr. Erskin Blunck		
<b>Weitere Verantwortliche/Ansprechpartner</b>		
<b>Modulart</b>		
<b>Zulassungsvoraussetzung</b>		
<b>Workload</b>		
15,00 x 25 Stunden = 375,0 Stunden, mit der folgenden Aufteilung		
<b>Präsenz/Kontakt</b> 0,0 Std. / 0,0 %	<b>Vor-/Nachbereitung/Selbststudium</b> 365,0 Std. / 97,3 %	<b>Aufgaben/Gruppenarbeit</b> 1,0 Std. / 0,3 %
