

Modulhandbuch

International Finance Master WiSe 16/17

Gültig ab: Sommersemester 2023

Module

1) Masterprüfung

IF-Master WiSe 2016

a) 1. Semester ECTS: 30

IF-Master WiSe 2016

103-001: Financial Management (7 ECTS, jedes Wintersemester).....	2
103-002: Financial Analysis (8 ECTS, jedes Wintersemester).....	11
103-003: Management Skills (7 ECTS, jedes Wintersemester).....	18
103-014: Quantitative Research (8 ECTS, jedes Wintersemester).....	26

b) 2. Semester ECTS: 30

IF-Master WiSe 2016

103-005: Applied International Corporate Finance (7 ECTS, jedes Sommersemester).....	33
103-006: Applied Quantitative Corporate Finance (8 ECTS, jedes Sommersemester).....	42
103-015: Research in Empirical Finance (7 ECTS, jedes Sommersemester).....	50
103-008: Derivatives & Financial Engineering (8 ECTS, jedes Sommersemester).....	56

c) 3. Semester

IF-Master WiSe 2016

103-013: Elective: Innovation in the Financial Industry (HfWU) (15 ECTS, jedes Wintersemester).....	63
103-009: Elective: Accounting (15 ECTS, jedes Wintersemester).....	68
103-010: Elective: Banking (15 ECTS, jedes Wintersemester).....	70
103-011: Elective: Business Administration (15 ECTS, jedes Wintersemester).....	72

2) Masterarbeit ECTS: 15

IF-Master WiSe 2016

103-012: Masterarbeit (15 ECTS,).....	74
--	----

Modulbeschreibung

Code 103-001	Modulbezeichnung Financial Management
------------------------	---

Beitrag des Moduls zu den Studienzielen

<p>Qualifikationsziele</p> <p>Students shall be able to do the following:</p> <ul style="list-style-type: none"> • Summarize and interpret concepts and differences in international accounting, management accounting and financial accounting. • Interpret and apply different concepts of modern financial management. • Recognize new problems in financial management, compare various methods and implement them in a suitable and effective way.
<p>Inhalte</p> <p>Financial Management</p> <ul style="list-style-type: none"> • Management Accounting • Financial Modeling • Applied IFRS
<p>Lehr-/Lernformen</p>

Voraussetzungen für die Teilnahme

Kenntnisse, Fertigkeiten, Kompetenzen	Basics in accounting
Vorbereitung für das Modul	Online course "Financial Accounting" of Harvard Business School recommended. Pre-reading of the recommended literature.

Verwendbarkeit des Moduls

Zusammenhang zu anderen Modulen innerhalb des Studiengangs	Students can apply acquired knowledge, skills and competencies within the International Finance programme as well as other Finance and Business Administration modules.
Einsatz in anderen Studiengängen	

Bezüge des Moduls zur Nachhaltigen Entwicklung

<p>Inhalte</p> <p>The contribution of the module to sustainable development is the awareness that all company stakeholders must gain thorough insight into the economic development of companies based on international accounting standards. Especially in internationally operating companies, the</p>

consolidation of financial figures is a prerequisite for sustainable management. Furthermore, sustainable development demands transparent coverage of all internal processes and calculations.

Qualifikationsziele			
With respect to acquired knowledge, students shall be able to do the following:			
<ol style="list-style-type: none"> 1. summarize and interpret state-of-the-art concepts in management accounting and performance management 2. evaluate and manage overhead costs adequately by applying Traditional Costing as well as Activity Based Costing and interpreting the compiled information 3. support new product development according to market needs, particularly meeting the necessary price and cost targets by applying Target Costing 4. see the different management accounting and performance management concepts and tools in an overall context and understand their interdependences 			
With respect to acquired skills, students shall be able to do the following:			
<ol style="list-style-type: none"> 1. identify data relevant to management accounting and performance management 2. solve problems in theory and practice by applying the above mentioned concepts and tools 3. evaluate and interpret practical cases and derive conclusions independently 			
With respect to acquired competencies, students shall be able to do the following:			
<ol style="list-style-type: none"> 1. recognize practical business challenges in the areas of management accounting and performance management 2. apply and modify their knowledge to new and complex challenges 3. draw on and make use of adequate sources of information in order to solve these challenges 4. perform necessary calculations in the course of problem solving with the above mentioned concepts and tools 5. reflect the derived results critically and draw conclusion 			
Wissen	Kenntnisse	Fertigkeiten	Kompetenzen

Inhalte

Part 1: Focus on Decision Making

Chapter 1: Managerial Accounting, the Business Organization, and Professional Ethics

- Careers in Accounting
- Roles of Accounting Information
- Performance Report

Chapter 2: Introduction to Cost Behavior and Cost-Volume-Profit Relationships

- Cost drivers and cost behavior
- Variable costs, fixed costs, step costs and mixed costs
- Cost-Volume-Profit Analysis
- Contribution margin and gross margin

Chapter 3: Measurement of Cost Behavior

- Cost functions
- Account Analysis
- High-Low-Method
- Least-Squares Regression Method

Chapter 4: Cost Management Systems and Activity-Based Costing

- Cost Management System
- Direct and Indirect costs
- Cost Allocation
- Manufacturing costs
- Traditional costing vs. Activity-Based Costing

Chapter 5: Relevant Information for Decision Making with a Focus on Pricing Decisions

- Concept of Relevance
- Alternative Income Statements: Absorption Approach & Contribution Approach
- Accept or Reject Special Sales Order
- Cost-Plus-Pricing
- Target Costing

Chapter 6: Relevant Information for Decision Making with a Focus on Operational Decisions

- Opportunity costs
- Make-or-Buy Decision
- Deletion or Addition of Products, Services or Departments
- Product-Mix-Decisions

<ul style="list-style-type: none"> - Keeping or Replacing Equipment <p><u>Part 2: Accounting for Planning and Control</u></p> <p>Chapter 7: Introduction to Budgets and Preparing the Master Budget</p> <ul style="list-style-type: none"> - Preparing a Master Budget <p>Chapter 9: Balanced Scorecard</p> <ul style="list-style-type: none"> - Preparing a Balanced Scorecard, incl. cause-and-effect relationships <p><u>Part 3: Product Costing (corresponds to part 4 in the textbook)</u></p> <p>Chapter 12: Cost Allocation</p> <ul style="list-style-type: none"> - Allocation of support department costs to producing departments - Direct method and Step-down method - Allocation of from producing departments to products

Beschreibung für die Lehrveranstaltung

Code 103-001-03	Titel der Lehrveranstaltung Applied IFRS
---------------------------	--

Ausgestaltung

Qualifikationsziele

With respect to acquired knowledge, students shall be able to do the following:

- summarize and interpret concepts and differences in international accounting
- describe the concepts and role of revenue, expense, asset, liability and equity accounts in financial accounting
- give an overview of the presentation and disclosure components of financial statements
- explain significant deviations between IFRS and US GAAP
- set the current legal environment in relation to the audit approach of an accounting firm

With respect to acquired skills, students shall be able to do the following:

- demonstrate valuation and presentation of balance sheet asset and liability accounts
- evaluate and analyze entity information and identify data relevant to financial accounting and reporting
- interpret basic financial statement information like balance sheet, income statement and statement of cash flows
- report results of conversion to international accounting in writing in a (consolidated) financial statement format

With respect to acquired competencies, students shall be able to do the following:

- perform calculations of measurement and valuation of important financial statement positions
- compare IFRS vs. US GAAP or local accounting standards

Wissen	Kenntnisse	Fertigkeiten	Kompetenzen
--------	------------	--------------	-------------

Inhalte

Content

1. Concept of International Accounting:

Capital market based history of US GAAP and IFRS, Standard setting bodies, Framework of international accounting (objective basic principles, Elements of F/S, Accounting policies, Subsequent events)

2. Presentation and disclosure of financial statements:

Balance sheet, Income statement, Statement of changes in Equity, Statement of cash flows , Notes to the financial statements (incl. Segment reporting), Interim financial reporting, Related Parties disclosures

3. Recognition, measurement and valuation of financial statement positions

<ul style="list-style-type: none"> • Tangible assets (PPE, leases, non-current assets held for sale, discontinued operations) • Goodwill and Intangible assets (R&D) • Impairment • Financial assets (business combinations, associates, joint ventures, financial instruments, cash) • Inventories, construction contracts, revenue recognition (POC method etc.) • Provisions, contingent liabilities • Employee benefits, stock compensation • Income taxes (incl. Deferred taxes) <p>4. Conversion process of a company to international GAAP (first time adoption of IFRS)</p> <p>5. The audit approach of an international accounting firm</p> <p>6. Summary: IFRS / US-GAAP comparison</p> <p>7. Recent developments (i.e. analysis of financial statement restatements, development of IFRS / US GAAP, IFRS 15 and 16)</p>
Lehr-/Lernformen
Lehr-/Lernmethoden Lecture, discussions, exercises, case analysis

Beschreibung für die Lehrveranstaltung

Code 103-002-02	Titel der Lehrveranstaltung Bond Analysis
---------------------------	---

Ausgestaltung

Qualifikationsziele

With respect to acquired knowledge, students shall be able to do the following:

- explain the features of different bond types
- summarize the real world factors that influence the price of bonds
- describe the difference between spot and forward interest rates
- describe different risk measures for bonds
- explain and compare different bond strategies

With respect to acquired skills, students shall be able to do the following:

- apply basic mathematical approaches for bond valuation
- interpret different risk measures of bonds such as duration and convexity
- implement different bond strategies
- classify bond strategies with respect to their risk

With respect to acquired competencies, students shall be able to do the following:

- evaluate and analyze the inherent risk of bonds
- apply bond analysis knowledge to solve complex problems in portfolio and risk management
- analyze investment restrictions and apply suitable bond strategies

Wissen	Kenntnisse	Fertigkeiten	Kompetenzen
--------	------------	--------------	-------------

Inhalte

1. Bonds

- Features of a Bond; Valuation; Real World Factors

2. Risk Measures

- Duration; Convexity

3. Bond Strategies

- Cash Flow Matching; Barbell Strategy; Duration Matching; Duration-Gap Analysis; Riding the Yield Curve; Arbitrage Strategies

Beschreibung für die Lehrveranstaltung

Code 103-002-03	Titel der Lehrveranstaltung Equity Analysis
---------------------------	---

Ausgestaltung

Qualifikationsziele

With respect to acquired knowledge, students shall be able to do the following:

- describe the essential tools necessary for the job of an equity analyst, including capital market concepts, financial statement analysis, financial planning and valuation methods
- describe the main steps in financial planning and in corporate valuation
- understand the top down (economy-industry-company) approach to financial planning and forecasting
- discuss differences between discounted cash flow based models and relative valuations as well as advantages and disadvantages of these approaches
- explain one-stage and multiple-stage valuation models
- explain advantages and disadvantages of relative valuation approaches
- list and explain the impact of the most relevant macroeconomic drivers of corporate valuation

With respect to acquired skills, students shall be able to do the following:

- Be able to consistently derive a forecast of a company's future financial statements based on an analysis of reported financial data and on assumptions regarding macroeconomic conditions, industry structure, competition, etc.
- apply one-stage and multiple-stage discounted cash flow models
- construct risk-adjusted discount rates
- use earnings-based, book value-based, revenue-based and sector specific multiples to perform a relative valuation of a company
- derive theoretically justified multipliers based on company fundamentals
- implement planning and valuation procedures in spreadsheet models
- analyze the expected impact of macroeconomic factors on corporate valuations

With respect to acquired competencies, students shall be able to do the following:

- independently perform an analysis and valuation of a potential equity investment
- identify the key drivers of the valuation of a company
- systematically derive an investment or disposal recommendation
- analyze and challenge proposals developed by others and identify the key drivers leading to the given investment recommendation

Wissen	Kenntnisse	Fertigkeiten	Kompetenzen
--------	------------	--------------	-------------

Inhalte

1. The purpose of Equity Analysis
2. Financial Statement Analysis

- The basics: financial analysis as a prerequisite for financial planning; Liquidity; Operating Performance; Risk Analysis; Adjustments to corporate accounts; Derivation of free cash flow (FCF)

3. Financial Planning and Forecasting

- Technical aspects of the planning process (top-down planning; closed-loop planning using spreadsheet models)
- Industry analysis and sales planning (Determinants of Industry unit sales and price levels; the industry life cycle; competition analysis)
- External factors and longer-term growth (external factors affecting longer-term growth perspectives; modelling consistent long-term growth estimates: the DuPont system)

4. Valuation

- Valuation approaches
- Discounted cash flow valuation (one-stage, two-stage, three-stage models; approaches to modelling the terminal value; comparison of dividend-discount, FCF-to-equity, and FCF-to-firm models; determining the discount rate)
- Relative Valuation (earnings-based, book value-based, revenue based and sector specific multiples; Definitional, descriptive, analytical and application tests of multiples)

5. Macroeconomic Aspects of Equity Analysis

- Business Cycle and asset allocation; impact of macroeconomic factors on stock prices

Bezüge des Moduls zur Nachhaltigen Entwicklung

Inhalte

Management skills are the basis for responsible and sustainable management decisions. Social sustainability in companies is one of the key success factors in a knowledge and technology driven society and can be regarded as a source for sustainable HR development programs and innovation processes. Especially in an international context, intercultural management and conflict management contribute to the long-term success of a globally operating company. International teams perform successfully when they are aware of the intercultural differences of their team members.

Ausgestaltung

Qualifikationsziele			
Students shall be able to do the following:			
<ul style="list-style-type: none"> • Recognize and discuss intercultural management and conflict management as an influential parameter in companies and organizations • Act and react sensible and with appropriate sensitivity in groups, meetings, and 1:1 talks with managers and employees, also concerning gender, ethnic background, or other diversity criteria • Apply international management knowledge to develop skills and operational abilities to manage intercultural conflict appropriately, effectively, satisfactorily and productively 			
Wissen	Kenntnisse	Fertigkeiten	Kompetenzen
Inhalte			
<p>Management skills are to a great extent personal social skills. Conceptualizing and comparing personal experience with typical patterns becomes a rich source for managerial practice and conflict competence. These patterns can be cultural, they can relate to gender or to group dynamics or the typical stages in groups, or social systems. Special tools help to recognize, analyze and shape communication in a goal-oriented way, starting with personal feedback to an employee or colleague (or receiving such feedback) up to giving directions to a group member. Leadership behaviour mostly consists in verbal communication, such as managing tasks, giving praise or encouraging someone. Open and critical awareness of one's own experience is necessary to acquire knowledge.</p>

Beschreibung für die Lehrveranstaltung

Code 103-003-03	Titel der Lehrveranstaltung Project
---------------------------	---

Ausgestaltung

Qualifikationsziele

The involvement of students in professors' research projects as well as in practical projects between universities and companies or other organisations creates the transfer between study, independent learning and practical implementation. The students learn the methodology of scientific work, quantitative methods, goal-oriented teamwork as well as the consideration of expectations and framework conditions on the part of the project partners.

Examples of projects:

- Cooperation in the research project of a professor
- Collaboration in a joint project between a professor and a company

Wissen	Kenntnisse	Fertigkeiten	Kompetenzen
--------	------------	--------------	-------------

Inhalte

Research projects:

- Methods of scientific work
- Methods of quantitative finance
- Approach and organization of research projects
- Empirical work: Conception, implementation, evaluation
- Preparation of a scientific seminar paper

Practice project:

- Project Management
- Technical content according to project content
- Processing of subprojects
- Presentation of the project results

Lehr-/Lernformen

Lehr-/Lernmethoden

Lectures, peer teaching, case study, discussions, exercises, group work, presentations, project work

Literatur/Lehrmaterial

depends on the project

Besonderes

PowerPoint-presentations for the Case Study, Live-simulations, Excel sheets for the Case Study

Organisation

Präsenz in SWS 2,00	Gruppeneinteilung nein	empfohlenes Fachsemester 1 Semester	Sprache Englisch
Präsenz/Kontakt 22,5 Std.	Vor-/Nachbereitung/Selbststudium 0,0 Std.		Aufgaben/ Gruppenarbeit 0,0 Std.

Modulbeschreibung

Code 103-014	Modulbezeichnung Quantitative Research
------------------------	--

Beitrag des Moduls zu den Studienzielen

<p>Qualifikationsziele</p> <p>Students shall be able to do the following:</p> <ul style="list-style-type: none"> • Explain the statistical and mathematical concepts underlying financial theory and econometric modelling • Solve quantitative problems in finance using modern IT-tools and econometric analysis. • Evaluate the results, estimation and hypothesis testing of quantitative models and econometric models. • successfully plan their research (e.g. empirical master thesis) as a project • to find the relevant (also international) literature, to read it critically and to use it productively in their research work • select the appropriate empirical methodology for their research questions and their research object • write according to the conventions in the scientific community • use IT tools such as literature databases or the reference management program Citavi effectively and efficiently • better assess the working methods and conditions of scientific research projects and thus to obtain suggestions for a possible scientific career at a later date • prepare an exposé on their research work
<p>Inhalte</p> <ul style="list-style-type: none"> • Finding and reading scientific literature • Writing a literature review and identifying a research gap • Defining a research question • Developing hypotheses • Instruments of quantitative research • Quantitative research with Matlab
<p>Lehr-/Lernformen</p>

Voraussetzungen für die Teilnahme

Kenntnisse, Fertigkeiten, Kompetenzen	Basics in mathematics and statistics
Vorbereitung für das Modul	Online course "Quantitative Methods" of Harvard Business School recommended. Pre-reading of the recommended literature.

Verwendbarkeit des Moduls

Zusammenhang zu anderen Modulen innerhalb des Studiengangs	Students can apply acquired knowledge, skills and competencies within the International Finance programme as well as other Finance and Business Administration modules.
Einsatz in anderen Studiengängen	

Bezüge des Moduls zur Nachhaltigen Entwicklung

<p>Inhalte</p> <p>Quantitative Research provides the more technical skills for sustainable management decisions. Without the necessary quantitative background managers are unable to make profound und responsible decisions. Sustainable development requires quantitative skills to reproduce the complex reality in a simplified way. They provide feasibility and decision support, reduced risk, additional insights and knowledge gain.</p>

Ausgestaltung

Qualifikationsziele			
Students know the risks that have to be managed by financial institutions as well as methods to decrease the individual financial risks and the regulatory framework. Moreover, they are able to apply techniques to measure risk and conduct calculations via Matlab.			
Wissen	Kenntnisse	Fertigkeiten	Kompetenzen
Inhalte			
1. Sources of financial risks (Market risk; Credit Risk; Insurance Risk, Operational Risk)			
2. Risk Handling (Risk Management Cycle; Regulation;			
3. Risk Measures (Value at Risk; Expected Shortfall; Coherent Measures of Risk; Backtesting)			
4. Capital Requirement (Regulation; Standardized Approach; Internal Rating Based Models)			
5. Probability of default (External credit ratings; internal credit ratings; Merton's model; concept of copulas)			
6. Stress testing			
Lehr-/Lernformen			
Lehr-/Lernmethoden			
Students are invited to actively participate in the lecture. Therefore, activating methods are used. In addition, the students are encouraged to work on practical applications using suitable computer programs such as EXCEL and MATLAB.			
Literatur/Lehrmaterial			
Lecture notes are provided. Theory, exercises and case studies are included in the lecture notes as well as enough space to fill in derivations and solutions to exercises.			
Literature:			
McNeil, A. J., Frey, R. und Embrechts, P.: Quantitative RiskManagement: Concepts, TechniquesandTools, Princeton University Press, 2015.			
Hull, J.: Risk Management and Financial Institutions, Wiley, 2015			
Besonderes			
Combination of lecture and intensive coaching in MATLAB coding.

Einsatz in anderen Studiengängen	

Bezüge des Moduls zur Nachhaltigen Entwicklung

Inhalte

Applied international corporate finance shows which growth strategies exist and how companies finance their expansion plans. Growth provides chances, but also contains substantial risks. Sustainable development of companies requires a sustainable financing with equity and debt in order to reduce the risks of a hazardous expansion.

Ausgestaltung

Qualifikationsziele

With respect to acquired knowledge, students shall be able to do the following:

- Summarize and interpret the reasons and success factors of M&A (including PMI).
- Give an overview of the main milestones of the M&A-process.
- Derive main ideas of business alliances as alternatives to M&A.
- Set M&A in relation to other corporate finance transactions like Going Public and Private Equity.

With respect to acquired skills, students shall be able to do the following:

- Ultimately be enabled to work in corporate departments being involved in M&A- and PMI -projects as well as advisors in M&A (e.g. investment banking, strategy consulting) after having finished their master education.
- Evaluate and analyze motives for corporate acquisitions and corporate disposals.
- Implement strategies for corporate acquisitions and corporate disposals applying the above mentioned milestones of the M&A-and PMI-process.
- Analyze and interpret practical M&A-cases and derive conclusions for the business practice independently.
- Present results of the M&A milestones convincingly.
- Set up an integration strategy.

With respect to acquired competencies, students shall be able to do the following:

- Apply and modify their knowledge to real M&A -transactions (via case-studies).
- Organize complex M&A-transactions on a strategic and financial basis.
- Structure M&A-milestone applying adequate legal documents.
- Recognize practical business challenges in the areas of M&A.
- Creatively develop a M&A- and PMI-strategy for buyers and sellers of corporate assets and corporate shares.
- Criticize the result of M&A strategies in business practice.
- Combine interdisciplinary knowledge (intercultural and conflict management as well as legal issues) in order to solve integration problems of an acquired entity.
- Develop alternative solutions for corporate acquisitions and corporate disposals and give recommendations to clients.
- Comprehensively present solutions to clients and defend them.

Beschreibung für die Lehrveranstaltung

Code 103-005-02	Titel der Lehrveranstaltung Private Equity & Acquisition Financing
---------------------------	--

Ausgestaltung

Qualifikationsziele

With respect to acquired knowledge, students shall be able to do the following:

- Give an overview of private equity financing and acquisition financing.
- See private equity and acquisition financing in context with other corporate finance transactions like IPO and mergers & acquisitions.
- Set private equity in relation to equity financing over organized capital markets.
- Summarize and present the different goals of equity and debt provider.
- Describe in their own words the most important financial instruments of equity financing, mezzanine financing and debt financing.
- Derive main ideas of LBO transactions.
- Ultimately be enabled on this basis to act as a junior in a private equity company and in an acquisition financing department after finishing their master education.

With respect to acquired skills, students shall be able to do the following:

- Have the ability to plan, conduct, finance and monitor an investment of a private equity company.
- Implement strategies for funding and organising a private equity company.
- Be able to analyze and identify promising investment opportunities and derive conclusions for the private equity company independently.
- Demonstrate how LBOs can be financed by debt.
- Present results of the investment process convincingly.
- Act as a reliable support and private equity manager to the top-management.

With respect to acquired competencies, students shall be able to do the following:

- Structure private equity investments from a financial, tax and legal perspective.
- Organize the investment process and exit based on a medium-term strategy.
- Recognize practical business challenges when financing companies by equity.
- Creatively develop an IPO strategy for issuers.
- Apply and modify their knowledge to real investment opportunities of private equity companies.
- Criticize the business ethics of financial investors focussing on their medium-term investment horizon.
- Value investment opportunities using specific valuation methods like multiples approach and IRR approach.
- Draw on and make use of adequate sources of banks in order to set up acquisitions financing models.

- Develop alternative financial models for companies looking for a private equity and debt financing.
- Comprehensively present different financial concepts to clients and defend them in argument.

Wissen	Kenntnisse	Fertigkeiten	Kompetenzen
--------	------------	--------------	-------------

Inhalte

Part 1: Private Equity

- What is private equity all about? Definitions; Case Study: Private Equity Ltd. acquires Packaging Group; Motives for private equity financing; Types of investments
- Who drives private equity? Bidder groups for equity capital The role of banks in the private equity business Investors in private equity
- How are private equity companies organised? Separation of fund and management Subsidiaries Management-, control- and advisory organs Inner organisation
- Investment contract Basic types and significant parts of the contract Adoption of existing contracts, important side contracts and covenants Project-oriented milestones Participation in advisory and control organs
- How is private equity done? Milestones of a private equity process Organizational milestones Project-oriented milestones Case Study: Private Equity Ltd. acquires Packaging Group

Part 2: Acquisition Financing

- What makes acquisition-financing special? Definition; The challenges of acquisition financing; Acquisition financing vs. buy-out / buy-in financing
- How does acquisition financing work? Functionality of Leveraged Buy-Outs; Exploiting the Leverage-Effect; Improvement of cash-flows; Improvement of company valuation; Integral parts of successful Leveraged Buy-Outs
- How to structure an acquisition? Acquisition financing - structuring the project under company law; Asset-Deal vs. Share-Deal; Acquisition financing - structuring the financing tools
- How to determine the financial structure of an acquisition financing? Determination of the debt service ability; Acquisition financing - role of equity capital; Acquisition financing - role of outside capital; Mezzanine capital

Qualifikationsziele

With respect to acquired knowledge, students shall be able to do the following:

- Give an overview of the main valuation methods
- Set company valuation in relation to other corporate finance topics like Mergers & Acquisitions, Going Public and Private Equity.
- Relate corporate planning to corporate valuation and to describe the linkages in their own words.

With respect to acquired skills, students shall be able to do the following:

- critically evaluate the results of the corporate valuation and to clarify any differences.
- interpret the results of the corporate valuation and to independently draw conclusions for corporate finance transactions.
- review the structure of the valuation model and the results of the corporate valuation with the help of a model review.

With respect to acquired competencies, students shall be able to do the following:

- transfer the results from the corporate valuation to other modules such as financial management, portfolio management and derivatives and to combine them with these modules.
- master theoretical and empirical challenges of corporate valuation.
- apply their knowledge to specific valuation projects and to adjust it to actual valuation situations.
- critically challenge the assumptions, algorithms and results of every valuation approach.
- present and defend the valuation results in front of clients.

Wissen	Kenntnisse	Fertigkeiten	Kompetenzen

Modulbeschreibung

Code 103-015	Modulbezeichnung Research in Empirical Finance
------------------------	--

Beitrag des Moduls zu den Studienzielen

<p>Qualifikationsziele</p> <p>Students shall be able to do the following:</p> <ul style="list-style-type: none"> • Explain the statistical and mathematical concepts underlying financial theory and predictive analytics such as linear regression, multiple regression as well as times aeries analysis and forecasting • Solve quantitative problems in finance using modern IT-tools and econometric analysis. • Evaluate the results, estimation and hypothesis testing of quantitative models and econometric models. • Prepare, present and critically discuss the results of their own empirical research.
<p>Inhalte</p> <ul style="list-style-type: none"> • Finding and reading scientific literature • Writing a literature review and identifying a research gap • Defining a research question • Developing hypotheses • Instruments of quantitative research • Quantitative research with Matlab and other software tools
<p>Lehr-/Lernformen</p>

Voraussetzungen für die Teilnahme

Kenntnisse, Fertigkeiten, Kompetenzen	In-depth knowledge of mathematics and statistics
Vorbereitung für das Modul	Online course "Quantitative Methods" of Harvard Business School recommended. Pre-reading of the recommended literature.

Verwendbarkeit des Moduls

Zusammenhang zu anderen Modulen innerhalb des Studiengangs	Students can apply acquired knowledge, skills and competencies within the International Finance programme as well as other Finance and Business Administration modules.
Einsatz in anderen Studiengängen	

Bezüge des Moduls zur Nachhaltigen Entwicklung

Inhalte

Empirical Research provides the empirical background for sustainable management decisions. Without the necessary quantitative background managers are unable to make profound und responsible decisions. Sustainable development requires quantitative skills to reproduce the complex reality in a simplified way. They provide feasibility and decision support, reduced risk, additional insights and knowledge gain.

Modulbeschreibung

Code 103-008	Modulbezeichnung Derivatives & Financial Engineering
------------------------	--

Beitrag des Moduls zu den Studienzielen

<p>Qualifikationsziele</p> <p>Students shall be able to do the following:</p> <ul style="list-style-type: none"> • State the key principles of financial theory, essential mathematical methods, and the concept of risk-neutral pricing. • Analyze and structure derivatives • Implement advanced mathematical methods and computer technology to create innovative solutions for pricing, hedging and trading of financial derivatives
<p>Inhalte</p> <p>Derivatives & Financial Engineering.</p> <ul style="list-style-type: none"> • Derivatives • Financial Engineering • Tutorial: Derivatives & Financial Engineering
<p>Lehr-/Lernformen</p>

Voraussetzungen für die Teilnahme

Kenntnisse, Fertigkeiten, Kompetenzen	<p>Knowledge, comprehension, skills and competences from following course units:</p> <ul style="list-style-type: none"> • Quantitative Research
Vorbereitung für das Modul	Pre-reading of the recommended literature.

Verwendbarkeit des Moduls

Zusammenhang zu anderen Modulen innerhalb des Studiengangs	Students can apply acquired knowledge, skills and competencies within the International Finance programme as well as other Finance and Business Administration modules.
Einsatz in anderen Studiengängen	

Bezüge des Moduls zur Nachhaltigen Entwicklung

<p>Inhalte</p> <p>Derivatives are instruments used to hedge risks of volatile currencies, interest rates or commodities. Financial engineering is the technique used to create custom-made financial solutions. Hedging instruments always need a counterpart, and this comes in the form of a speculator. This means that hedging has two sides of a coin, which are risk reduction and</p>

speculation. Sustainable development in financial industries requires in-depth knowledge about how derivatives are engineered and how they can be used for companies' purposes. The module contains a critical review of derivatives in the context of an abusive use of speculation.
