2021

Program: Friday, 9.30 -17.00 CET

About the Masterclass

9.30 -9.45	Introduction by Prof. Sven Kesselring
9.45- 10.30	Keynote by Dr. Weert Canzler
10.45 – 12.30	Presentation & discussion of PhD work
12.30 - 14.00	Lunch break
14.00-14.45	Keynote by Dr. Jack Stilgoe
15.00-16.45	Presentation & discussion of PhD work
17.00	End of event

Automation is a fast moving phenomenon that has entered the mobility arena. Artificial intelligence is a “technological tsunami” (Elliott 2018) that transforms modern lives, communication, intimacy, production, design, and not at last: mobilities deeply and unavoidably.

This masterclass, co-organized by Erasmus+ EU Research Network CCAMEU and HfWU, focuses on current research and specifically PhD work.

PhD students working on automated mobilities will present their ongoing research. There will be keynotes by Dr. Weert Canzler (WZB, Berlin) and Dr. Jack Stilgoe (UCL, London) on the social implications and consequences of the transformations.

The event is open for everyone.
