

# AUTOLOAD

Charging credit at the cash point

*Usually you pay non-cash with your student ID in our canteens and cafeterias.*

*The easiest way to get your student ID recharged with credit is Autoload.*

## How it works

As soon as your credit falls below a certain limit during the payment at the cash point, you can recharge your card directly without cash. You define your limit amount and your charging amount yourself when you register for Autoload. With Autoload you always have enough credit on your student ID – without having to use cash or your cash card.

### Simple

To use Autoload you simply need to register one-time at our info points/cash points in our canteens or cafeterias. Please bring your student ID and your cash card to get registered. **Notice: It's only possible to register for Autoload if you have a German bank account.**

### Individual

You define the limit amount as from which you want to recharge credit and you determine your charging amount.

### Distinct

Before each charging at the cash point you will be asked if you want to recharge credit. In addition you receive a receipt. Thus, you always have your transactions set on your sight.

Register now!
